Validity of academic qualifications granting access to university studies

In the case of a foreign academic qualification, the prerequisite final secondary school leaving qualification must be compliant with the applicable regulations governing academic qualifications granting access to university studies (for further information, please consult the following [page](#)).

Only academic qualifications obtained after at least two years of attendance in the foreign system will be considered valid for university enrollment purposes.

The Chinese secondary school diploma will be considered eligible only if accompanied by the certificate attesting that the student has successfully passed the GaoKao exam based on the passing score of the relevant province.

The final certificate of the foreign academic qualification obtained must be translated and legalized by the Italian diplomatic or consular authorities for the country whose education system awarded the qualification and must be accompanied by the relevant statement of validity (*dichiarazione di valore*) or recognized by Italian ministerial decree. That documentation must confirm the validity of the academic qualification for the purposes of its granting access to university studies in Italy and be consistent with the information provided when submitting the application.

The onus is on students to check the validity of their academic qualification for the purposes of its affording access to the chosen degree program, to fulfil all obligations relating to the issuing of a student visa and to verify all requirements for access to the University's premises in accordance with current legislation. Applicants can contact CIMEA <http://www.cimea.it/> for an advance assessment of their qualifications
